|--------------------------------------|------------------------------------|
| 14:00: Introduction | Peter Van Daele (imec) |
| 14:10: Testbed's presentation | Brecht Vermeulen (imec) |
| 14:20: Success story 1 | Daniele Miorandi (U-Hopper) |
| 14:30: Success story 2 | Paulo Marques (Allbesmart) |
| 14:40: Fed4FIRE+ Open call's | Peter Van Daele (imec) |
| 14:45: Q&A and conclusion | |

Introduction

“Digital Society” is supported by a wide range of technologies

- Wide range of technologies (wireless, wired, cloud, Big Data, 5G, IoT, ...)
- Linking & interaction between heterogenous technologies

Introduction

New research / ideas / concepts / products / tools ...

Need to be implemented in a

- Highly competitive environment with
- Rapidly evolving requirements
- In multi- & cross-technology areas

Calls for

- Up-to-date testing facilities
- Skilled support

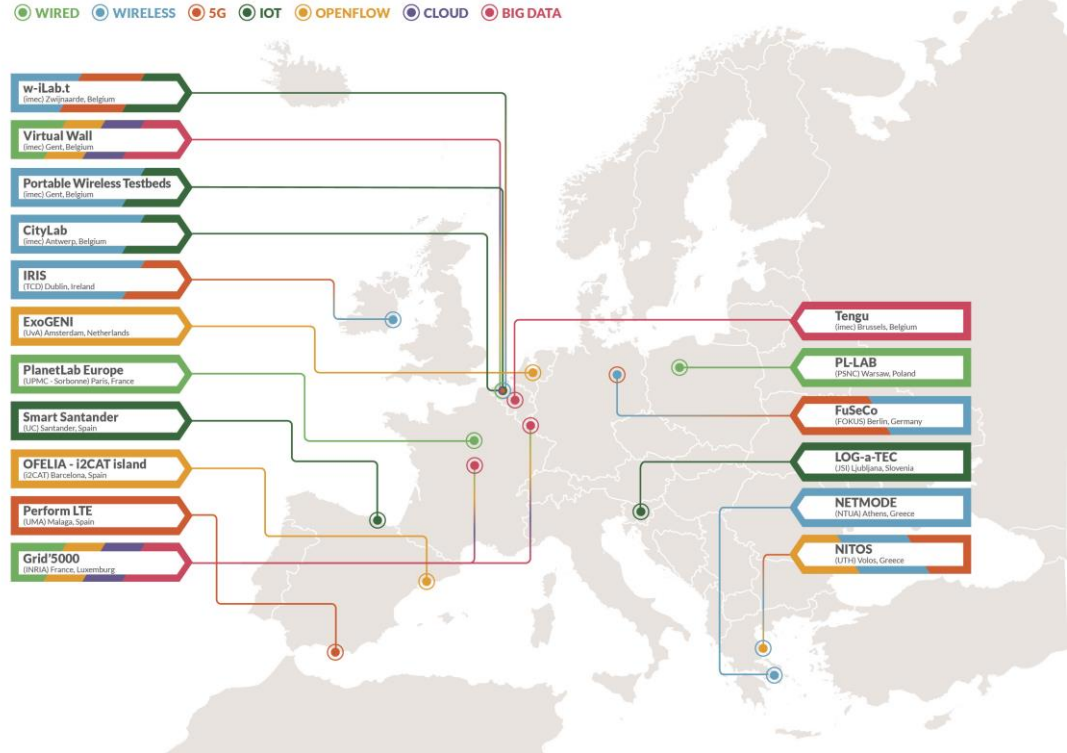

Too expensive for many players ...

Objectives Fed4FIRE+ (2017 – 2021)

Starting point:

- Europe has top-quality testbeds in (FIRE) NGI area
- **Make these accessible to SME's, Industry, Academia, RI,..**
- Fed4FIRE (FP7) made this into “best-in-town” federation (2012-2016)

Objectives Fed4FIRE+ (2017 – 2021)

Fed4FIRE+

has the objective to

- serve the **community** and to
- support **digital transformation**

by

- offering **low threshold** access to
- a **top-quality** Research Infrastructure
- for a **broad spectrum** of activities in the IT domain
- covering a **wide range of technologies**
- and supporting **cross-technology** applications

Areas covered

Fed4FIRE+ supports NGI research domain with open, accessible and reliable facilities providing a wide variety of different technologies:

- Wired testbeds
- 5G testbeds
- Openflow testbeds
- Big Data testbeds
- Wireless testbeds
- IoT testbeds
- Cloud testbeds

Simple, efficient, and cost effective experimental processes

(research, development, upgrade, stress-test, reality-check, ...)

Areas covered

Is this for you??

Submitted proposals - all calls

■ Academia ■ Industry ■ Research Institution ■ SME

Accepted proposals - all calls

■ Academia ■ Industry ■ Research Institution ■ SME

Modalities

Accessible

- for FREE (Open Access)
- with funding (Open Calls)

All testbeds are operated by Academia or RI's

Vendor / Operator neutral

“Your IP” remains “Your IP”

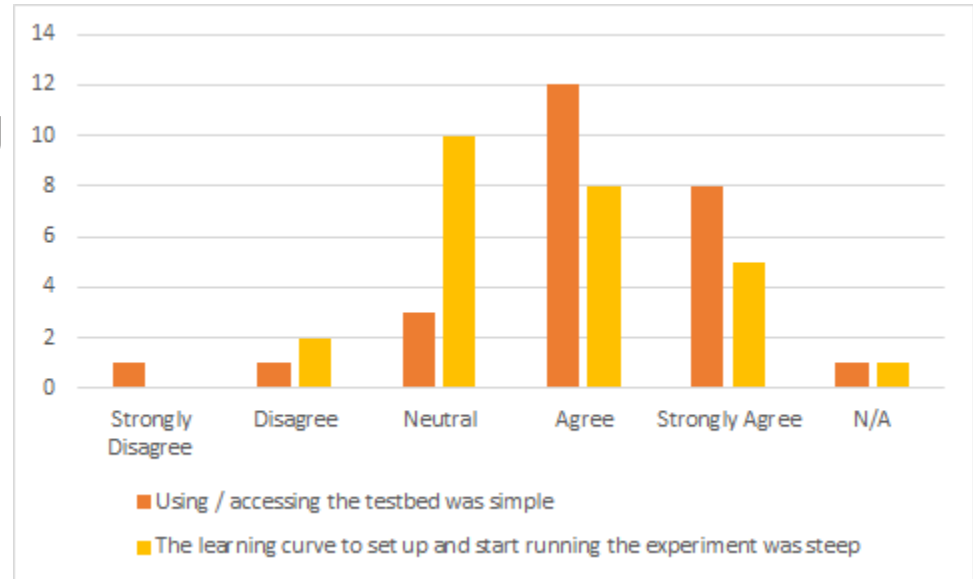

Experimentation on Fed4FIRE+ Testbeds

Objectives

Fed4FIRE+ works on:

- Lowering threshold for experimentation by SME, industry and research organisations,
- Upgrading and improving to increase user satisfaction

Agenda

- | | |
|--------------------------------------|------------------------------------|
| 14:00: Introduction | Peter Van Daele (imec) |
| 14:10: Testbed's presentation | Brecht Vermeulen (imec) |
| 14:20: Success story 1 | Daniele Miorandi (U-Hopper) |
| 14:30: Success story 2 | Paulo Marques (Allbesmart) |
| 14:40: Fed4FIRE+ Open call's | Peter Van Daele (imec) |
| 14:45: Q&A and conclusion | |

The Open Calls

Purpose of the competitive open calls

Lower threshold for experimenters to access the Fed4FIRE+ facilities:

- By providing funding
- By providing a Patron for support in setting up / running experiment
- Low administrative effort (no “EU formalities”)

In return experimenter needs to provide:

- Reporting
- Presentation
- Feedback

Participation in Open Calls

Proposal preparation (Open Call 9 – open now):

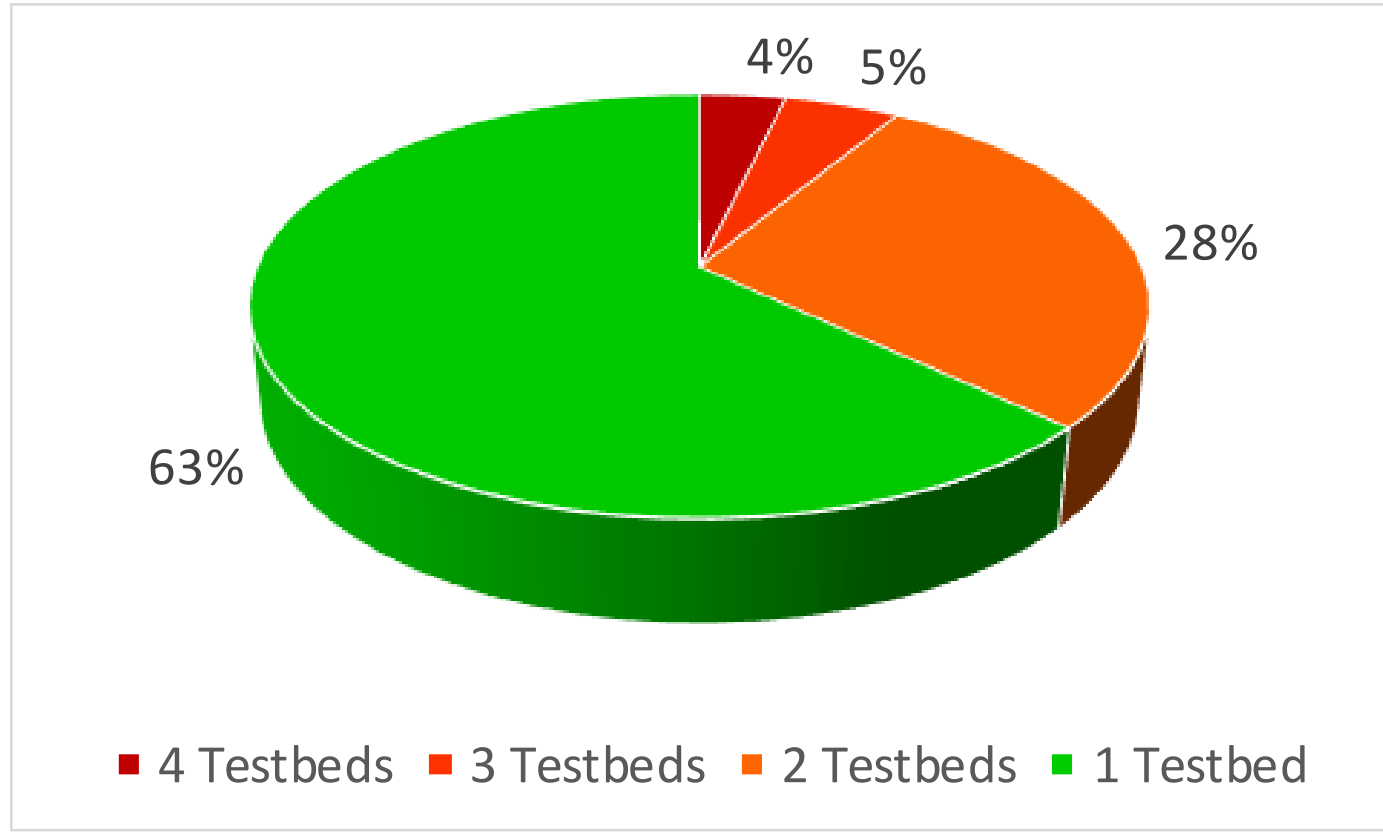

- Project Summary (1 page) → **5 months duration**
- Detailed Description and Expected Results (target length 6 pages)
- Requested Fed4FIRE+ tools, testbeds and facilities (1 page form)
- Compliance check (Patron to provide)
- Background and qualifications (1-2 pages)
- Expected feedback to the Fed4FIRE+ Consortium (1-2 pages)
- Future plans (1 page)
- Requested funding (1 page form) → **55k max**
- Participation in previous Open Calls of the Fed4FIRE+ project. (1-2 pages)
- Open Research Data (form to be completed)
- Survey & Use of proposal information

Participation in Open Calls

Proposal preparation (SME Continuous Call – every 2 weeks):

- Project Summary (1 page) → **1 month duration**
- Detailed Description and Expected Results (2 pages)
- Requested Fed4FIRE+ tools, testbeds and facilities (1 page form)
- Compliance check (Patron to provide)
- Background and qualifications (1/2 page)
- Requested funding (1 page form) → **10k max**
- Participation in previous Open Calls of the Fed4FIRE+ project. (1-2 pages)
- Open Research Data (form to be completed)
- Use of proposal information

1 or multiple testbeds??

**Added value to
Experimenters**

Fact check !

Open Call experimenters like

- The variety of testbeds / technologies
- The open access
- The ease of use

Added value to experimenters

Running the experiment had a significant impact on my business as a company or my research activities as an organisation

Running the experiment greatly facilitated improving my product / research subject

Co-funded by the
European Union

Co-funded by the
Swiss Confederation

This project has received funding from the European Union's Horizon 2020 research and innovation programme, which is co-funded by the European Commission and the Swiss State Secretariat for Education, Research and Innovation, under grant agreement No 732638.

A graphic featuring a target with concentric circles in shades of red and orange, with a dark blue center. The text "That's all Folks!" is written in a white, cursive font across the target.

That's all Folks!
